## Features:

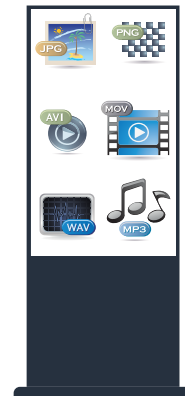

### Display the best you with your best display.

Your content outshines the competition, as our digital standee can display up to 350 nits of peak brightness. Grab people's attention with up to 4k resolution, with a 178-degree FOV for superior clarity and visibility from any angle.

**Your kiosk is unique. Uniquely yours.** You can pick what you want, from the display size and type to the hardware and software configurations. Choose between Android or Windows, customize the apps to your requirements and run them on the kiosk without any flaws.

**Play any file, Display your style.** Run any media format, from image and video files to even 3D interactive software. All thanks to the capable processor, along with up to 4GB RAM and up to 32GB of local storage.

**In the clouds, yet down to earth.** The standee stands on the ground, yet always connected to the cloud. With options like ethernet, Wi-Fi, 3G and 4G cellular network connections, our kiosk is always online and ready to guide the user. Use the Truecast tool to manage and broadcast your content and the dotHive tool to control the kiosk remotely, over the cloud.
