Features:

Point your customers (and yourself) in the right direction with our **Large Screen Kiosks** that can display the entire landscape or layout of the area in one kiosk.

Travel far, with just your fingers. Pinch to zoom into maps to see more of one location and pan over maps to see what's nearby. Our 10-point capacitive touch display boasts of Full HD resolution with 178 degree viewing angle, so that more people can view it at the same time.

Display the whole world on one screen. Run any media format, from image and video files to even 3D interactive software. All thanks to the capable processor, along with up to 16GB RAM and up to 32GB of storage.

Showcase anywhere from anywhere. With options like ethernet, Wi-Fi, 3G and 4G cellular network connections, our kiosk is always online and ready to guide the user. Use the Truecast tool to manage and broadcast your content and the dotHive tool to control the kiosk remotely, over the cloud.
